

Binna Clinic

Free hearing screening for Aboriginal and Torres Strait Islander school-aged children.

Screening takes place at the Kirwan Health Campus.

- No referral required
- Phone for an appointment

Hearing loss can be prevented by:

- Getting your kids' ears checked regularly
- Keeping your kids clean - washing hands and faces regularly
- Eating healthy food
- Making sure all kids get their vaccinations
- Getting kids to do their Breathe, Blow and Cough exercises
- Not smoking - your smoke is bad for kids too
- Not sticking anything in your kids' ear, including ear buds, unless recommended.

Hearing Health Facts

Hearing is important for a kids's speech and language development.

If kids can't hear...Kids can't learn.

If your have any concerns about your kids's hearing or wish to have their hearing checked, see us at Binna Clinic.

If your kid complains of ear aches or has runny ears...See your doctor.
